Product Description

Advent Calendar - Reprint from 1952 - old town setting

This Advent calendar can be set up easily. A foldable scenery on the left and on the right give the Advent calendar a good stand. The two market stalls complement the events on the snow-covered market square in a three-dimensional way. A very lively image, where there is a lot to discover. Shining through backgrounds give this pre-Christmas decoration an enchanting overall impression.

The carefully placed little windows ensure that the wonderful picture is preserved in its beauty, even when all the windows are open. It is a pleasure to "walk" on a table with your eyes and discover new and funny details.
