Product Description

8 glasses of red wine

The wine is shimmering red in the beautifully shaped glasses.

For over 60 years, Reutter has been making its own large collection of porcelain. They are the only ones in Germany when it comes to porcelain miniatures. Their attention is to the detail. The porcelain items are picked up to 17 times during the manufacturing process: they are cast, glazed, painted and fired three times until they radiate their typical Reutter flair. Synthetic resins are used to model particularly fine and filigree articles in order to achieve the greatest possible attention to detail.

Reutter is constantly working to round off and supplement his collection of miniatures. In doing so, they succeed time and again in inspiring collectors from all over the world.
