Product Description

20-30-40 are the new dream dimensions of all interior designers - the design with the mouth-blown, satin-finished glass in three different heights was thankfully not created on the drawing board and thus each vase is unique. Its narrow, long shape with a uniquely heavy feel is ideal for individual flowers, branches or artificial leaves. The solid glass in a trendy grey-green colour ensures a secure stand.

Caution! Not suitable for children under 36 months.

- Material: mouth-blown, satinised glass
