## Product Description

A table torch that inevitably triggers the secret wish for eternal darkness. Because as soon as the sun has disappeared on the horizon, the grandiose appearance of TIKI approaches. Garden parties, barbecues and summer festivals have a new highlight. The shape of the torch is reminiscent of the Olympic fire. Thanks to the invisible use of modern technology in the form of glass-fibre wicks, which in principle never burn if handled properly, it is the reliable and immaculately romantic companion through the night. Caution. Not suitable for children under 36 months.
