Product Description

Thimble Full Decor "Luster green", miniature

Our Reutter Porzellan thimble "Luster green" is painted with a beautiful full decoration. Each thimble comes in an attractive gift box. A nice gift for every thimble collector!
In today's artisan ceramic technology, metal nitrate and metal chloride solutions are applied before the second firing to produce planar and continuous lustrations. Also, iridescent surfaces produced with other techniques or glazing materials are often referred to as "Luster" - as with art glass.
