Product Description

Mouth-blown, well-shaped glass combined with a neatly embroidered handle made of genuine leather bears a name: MARLON. The name stars are made of. The gala takes place every year in the garden and on the terrace. MARLON is an outdoor product in a class of its own and a guarantee for real summer cinema. Its frosted rim in the lower part of the glass gently reflects the tea light and spreads calm and serenity with a high chill factor. Caution! Not suitable for children under 36 months.
