from **94,03 EUR**

Item no.: 336060

shipping weight: 0.40 kg

Manufacturer: KED Helmsysteme

Product Description

Mitro UE1 L, Ash Matt

There can be no doubt that the helmet is by far the most important part of a cyclist's equipment. Reason enough to concentrate on one central task: developing and producing optimal head protection systems.

Bicycle helmet with MIPS - Brain Protection System (BPS), NTA, FIDLOCK(R) technology, BOA(R) system, 6 ventilation openings and safety LED light with integrated battery. This helmet meets the NTA 8776 standard for pedelec helmets.

- MIPS – Brain Protection System (BPS): Falling at an angle creates rotational motion and science has shown that our brains are very sensitive to rotational forces. The core of the MIPS BPS System is a low friction layer that allows the head to move 10–15 mm relative to the helmet in all directions, reducing rotational motion to the brain. The MIPS System makes your helmet safer and adds protection.
- FIDLOCK(R): The FIDLOCK(R) technology makes it even easier to close the fastening buckle. Thanks to the combination of magnetic force and mechanical lock-in, the FIDLOCK(R) fastening buckle closes almost automatically and can be operated single-handedly. No unintentional pinching of the skin. The buckles are highly reliable, robust and secure.
- BOA(R) SYSTEM: We seamlessly integrated the BOA(R) system into our 360° head ring for maximum comfort. With its ingeniously simple, one-handed operation, you can also fine-tune the fit while cycling. The BOA(R) system guarantees a safe and perfect fit in all situations.
- Colour: Ash Matt
- Size: L (58 cm - 61 cm)
- Weight: 370 g
- Certificated EN 1078 and NTA 8776
