Product Description

A sustainable, Danish-made bowl set from the Dinnertime range in the tiny line from dantoy. This set consists of two bowls that can be used from the very beginning when introducing small children to food. The bowls have a high, straight rim that helps the child to scoop food onto the spoon. This strengthens the child's fine motor skills. This tableware set can easily be extended with other items from the Dinnertime range, which are suitable for different meals and allow for beautiful colour combinations and additional tableware. This crockery set has a long lifespan as it can be used from the first meal and can be adapted according to the child's developing skills and motor skills. This bowl set is a dantoy crockery set made in Denmark from recyclable bioplastic. The set consists of 2 bowls in pretty, natural tiny colours. The sustainable and high-quality bowl sets from the Danish brand dantoy create a basis for good mealtimes where the child can learn about food and develop fine motor skills. Combine different sets and colours from the Dinnertime range to create a beautiful selection for your home.
