Product Description

Woodrow wooden waste paper basket, natural / spruce

Two-tone wooden waste paper basket for the office, bathroom, living room and more.

Turn an everyday household item into a modern and contemporary piece of furniture. We introduce the Woodrow waste bin from Umbra. The woodrow, made of naturally treated wood, warms and earths its surroundings, although its actual job is that of a garbage can. With Woodrow you can set a modern and fine decorative accent in your bathroom, office, living room and your guest toilet in no time at all. This two-tone trash can fills any room with modern and contemporary aesthetics.

The rubbish bin made of naturally treated wood with a colored outside offers a modern and good-looking alternative to the classic rubbish bin.

Woodrow is available in numerous color variants, the inside always comes in natural wood color. Woodrow's integrated handles make carrying and emptying particularly pleasant and easy. Woodrow measures 23 cm in diameter and 28 cm in height and, with its capacity of 7.5 l, is particularly suitable for small rooms.

About Umbra: Umbra is an international design company that specializes in original, modern, cool, functional and affordable products for home and living.
