from **44,25 EUR**

Item no.: 395953
shipping weight: 0.20 kg
Manufacturer: Philippi Design

Product Description

ULTRALIGHT. ULTRA THIN. ULTRASCHÖN. It should not have escaped anyone's notice that Japanese craftsmanship is obsessed with precision in its DNA, which is regularly demonstrated by some impressive kitchen knife treasures made of Damascus steel, among other things. The same naturally also applies to glass art made in Nippon, which has arrived in the here and now with the ultra-puristic, two-piece NIL set. With a wall thickness of just 0.8-1mm and a weight of 80g, the drinking vessels made of lead-free crystal glass are so astonishingly light as a feather that they seem to be non-existent. The absence of the usual thick base makes the glasses no less stable and gives them an even more precious appearance. Available in two sizes, S and L, spirits, juices and mineral water have found a marvellous new home. Kanpai!- Material: Ultra-thin, mouth-blown and hand-polished glass- Weight: 500 g- Length: 8 cm- Width: 8 cm- Height: 9 cm
