## 155014 - Nile glass set 2 pcs L

from **52,41 EUR**

Item no.: 395954  
shipping weight: 0.20 kg  
Manufacturer: Philippi Design

### Product Description

ULTRALIGHT. ULTRA THIN. ULTRASCHÖN. It should not have escaped anyone's notice that Japanese craftsmanship is obsessed with precision in its DNA, which is regularly demonstrated by some impressive kitchen knife treasures made of Damascus steel, among other things. The same naturally also applies to glass art made in Nippon, which has arrived in the here and now with the ultra-purist, two-piece NIL set. With a wall thickness of just 0.8-1mm and a weight of 80g, the drinking vessels made of lead-free crystal glass are as amazingly light as a feather as if they did not exist. The absence of the usual thick base makes the glasses no less stable and gives them an even more precious appearance. Available in two sizes, S and L, spirits, juices and mineral water have found a marvellous new home. Kanpai! Exclusive drinking glasses: mouth-blown crystal glass in a modern design. Glass sets are key elements for enjoying drinks in style. Glasses made from crystal glass are particularly popular due to their purity and brilliance. Mouth-blown and hand-polished glasses are characterised by their unique finish, which makes each piece an individual work of art. With ultra-thin walls and a light weight, these glasses are both elegant and robust. The modern design, which dispenses with a thick base, gives the glasses a floating appearance that makes them look particularly elegant. These glasses go perfectly with any table setting and are ideal for spirits, juices or mineral water. Their timeless look makes them suitable for both festive occasions and everyday use. A high-quality glass set is not only functional, but also a stylish accessory that enhances any table. Presented in an elegant gift box, these glasses are also an excellent choice as a gift. They show a sense of style and appreciation for high-quality products. To summarise, glass sets made of crystal glass, which are mouth-blown and hand-polished, offer a perfect combination of functionality and stylish design. They are a must-have for anyone who values elegant and versatile drinking glasses. - Material: Ultra-thin, mouth-blown and hand-polished glass - Weight: 500 g - Length: 8 cm - Width: 8 cm - Height: 14 cm
