### Product Description

#### Display "General Store"

Our new, large village shop has everything that the household could need in everyday life. In addition to the many preserves in jars and tins for storage, there are also fresh goods from the counter or from the barrel, such as hanging sausages, cheese, cucumbers, apples and salad. Of course, wine and even cola in bottles are also available. And for those with a sweet tooth there is chocolate, cake or even donuts. The high-quality porcelain scales, which weigh everything exactly, and the pull-out drawers offer various herbs and spices. The village shop looks even more impressive thanks to a variety of finely selected miniatures made of porcelain and many other materials and the new size.

There is now a new size for the miniature displays! The newly developed Series 820 rooms are twice as wide as the Series 801, with the special feature of large, usable wall and floor surfaces (over 8 cm deep) on which 1:12 furniture can easily fit. Thus detailed rooms can be designed.

The Displays are built of stained willow or birch and decorated with stucco elements. With real glass panes there is also no need to worry about scratches or blind spots and they protect the miniatures from dust. For access the panes can be removed upwards. Individual pieces are fixed so they can't fall out. All miniature rooms can be propped or hung up.

Skilled workmanship and love of detail gives our miniatures their own special Reutters look. All our gold decorated porcelain pieces are hand painted in 24k and fired in a kiln up to three times at 800°C (1470°F). Our miniature masterpieces fascinate people all over the world and awaken an undiscovered passion for collecting.

All miniatures with strict attention to detail and love, so that you can have your own unique copy at home. Your original may vary slightly from the picture.

Our miniature products are not suitable for children under 14 years old.
